Gain insight into the world of nature-inspired optimization techniques and algorithms. This book will prepare you to apply different nature-inspired optimization techniques to solve problems using Java. You'll start with an introduction to nature's hidden algorithms and find the approximate solutions to optimization problems. You'll then see how living creatures such as fish and birds can perform computations to solve specific optimization tasks. This book also covers various nature-inspired algorithms by reviewing code examples for each one followed by crisp and clear explanations of the algorithm using Java code. You'll examine each algorithm's use in specific industry scenarios such as fleet scheduling in supply chain management and shop floor management in industrial...

After a decade of living with panic attacks and anxiety, Tim Clare made a promise to himself he would try everything he could to get better, every method and medicine. His year of treatments took him from antidepressants to hypnosis, running to extreme diets, ice baths to fecal transplants. At the end of it, he discovers what helps him and what doesn't, and what might help others. Most of all, he comes to rethink anxiety and encourages all of us to do the same. Tim Clare has suffered from extreme anxiety and panic attacks for a decade. At their worst, his attacks would see him curled on the floor, screaming at his wife for help. This was something the couple just got used to and were able to manage until they became parents. With the arrival of Tim's daughter came a new wave of extreme anxiety...

My Subconsciously Feminist Father imagines a world where parents, especially fathers, yearn for and attempt to raise feminist sons. Yashika Singla writes about how she and her two siblings a sister and brother were accidentally raised as feminists by her very ignorant-inthe-matter father, simply because he believed in the concept of fairness and, together with her mother, made an honest attempt to raise their three children equally. Recounting examples from her childhood and young adulthood, Yashika shows how even the smallest actions undertaken by parents can impact the world they create for their children. She discusses how the feminist ideals she unthinkingly absorbed as a child ultimately came to the fore in her adult relationships and gave her the confidence to stay true to herself. Peter Turchin, one of the most interesting thinkers today, has infused the study of history with insights from other fields for over a quarter of a century. End Times is the culmination of his work to understand what causes political communities to cohere and to fall apart. The lessons of 10,000 years of world history are clear, Turchin argues: when the equilibrium between ruling elites and the majority tips too far in favor of the elites, political instability is all but inevitable. Before the industrial era, the imbalance between labour and capital, signaled by growing economic inequality, was usually caused by excessive population growth. For the past 250 or so years, it has been laissez-faire government, technological innovation, globalization and immigration that have tended to disrupt the...
