Many workers believe that to compete with other top talent, they must embrace a culture that rewards long hours and a constant connection to work. Businesses and society endorse busyness, overwork, and extreme commitment as the most valued traits in workers. Sometimes that endorsement is explicit, as when Elon Musk told Twitter employees to work long hours at high intensity or get fired. More often it's an implicit contract, a buildup of organizational and cultural norms and the adoption of new technologies that make it easy to tether people to work. Either way, this workaholic behavior is unhealthy and counterproductive for workers and for organizations. It's time to fight back. In the early 1900s, a Bengali doctor created the first Indian fountain pen in Varanasi. Going beyond the nostalgia and lost sheen of fountain pens, it tackles economic transition and the impact of policy on local enterprise. Just as there has been exit, post-liberalization, there has been entry too, in what is often perceived to be a sunset sector. The book takes stock...
