# A lipid-based foam nano emulgel composition for topical application

## NEED

There is a need for a drug delivery vehicle with solubility and permeability suitable for effective drug delivery both in vitro and in vivo.

## SOLUTION

The invention introduces a lipid-based foam nano emulgel composition and a method for its preparation for effective topical application.

## INNOVATION

The development of a lipid-based foam nano emulgel composition with specified ingredients and a method for its preparation for effective topical application.

## MARKET ANALYSIS

Market: Topical treatments for skin diseases  
CAGR: Advancing at 8-10%  
Potential Indian Clients: Pharmaceutical companies, dermatology clinics

## WHY INVEST?

- Active pharmaceutical ingredients (APIs)
- Permeability
- Gelling agent
- Surfactants

## AT A GLANCE

- Current TRL NA
- Funded by NA
- IPC A61K, G01N
- Domain  
Dermatological pharmaceuticals
