

BITS students to develop tenant verification app for Goa police: Students of BITS Pilani will develop an app for tenant verification for Goa police at CreateAthon 2023, an event organised for engineering students to develop the app. Students desiring to develop an app will have to form a group with minimum two members and not more than four members. It will have to be developed with a database management system to enable police to record or enter data online. Goa police also wants the app to have features to record biometrics, Aadhaar and voter card details.
